

ProSearch Enterprise

Discovery is a business process. It can be measured, managed, and improved. Our enterprise solutions align to your business goals and lead to operational excellence that will transform your discovery process. Discover a solution built for you.

The Enterprise Advantage

For companies seeking to manage more than matters, ProSearch takes a broader view—empowering legal teams to better manage the discovery process. We offer enterprise solutions from the ground up, including platform, support, and services.

Managed Services

Operating as an extension of your team, we help you execute your operational objectives within and across your matters—allowing you to deliver real business impact and your legal professionals to focus on legal issues and strategies.

Managed Support

Our multi-disciplinary managed support team brings advanced skills in ESI, discovery, data transformation, scripting, application, and technical disciplines. We are here to support our Managed Services team, your legal department, and your legal providers.

Managed Platform

With a decade of experience delivering and extending dedicated Relativity solutions for our clients, our Managed Platform teams will help build a strong foundation for your discovery success.

Benefits

Create Visibility

Driving work through an enterprise solution allows you to collect and analyze metrics and data from across your discovery portfolio, creating the insights necessary to evolve and optimize your discovery solutions.

Improve Outcomes

Optimizing processes and measuring performance leads to operational excellence that increases your velocity, improves quality, and reduces your risk.

The Big Picture

The ProSearch Enterprise Solution revolutionizes the way we discover by seeing the big picture and integrating innovations at every step of the process. To learn more visit prosearch.com/enterprise.
